System Supplies and Builds

Made to Measure

We offer a variety of computer systems to cover an extensive range of requirements, from a single desktop PC or networked PC's to file, resource and application servers.

All systems are specified and constructed to suit your precise requirements and budget. We will visit you onsite, at a time of your choice, and examine your requirements and work closely with you to make sure that you are fully satisfied with your particular configuration.

Machine application types include:

-  **Exchange Mail Server**
-  **Terminal Services Server**
-  **Application Server**
-  **File Server**

Please visit our website or contact us to find out if our service is right for you.
